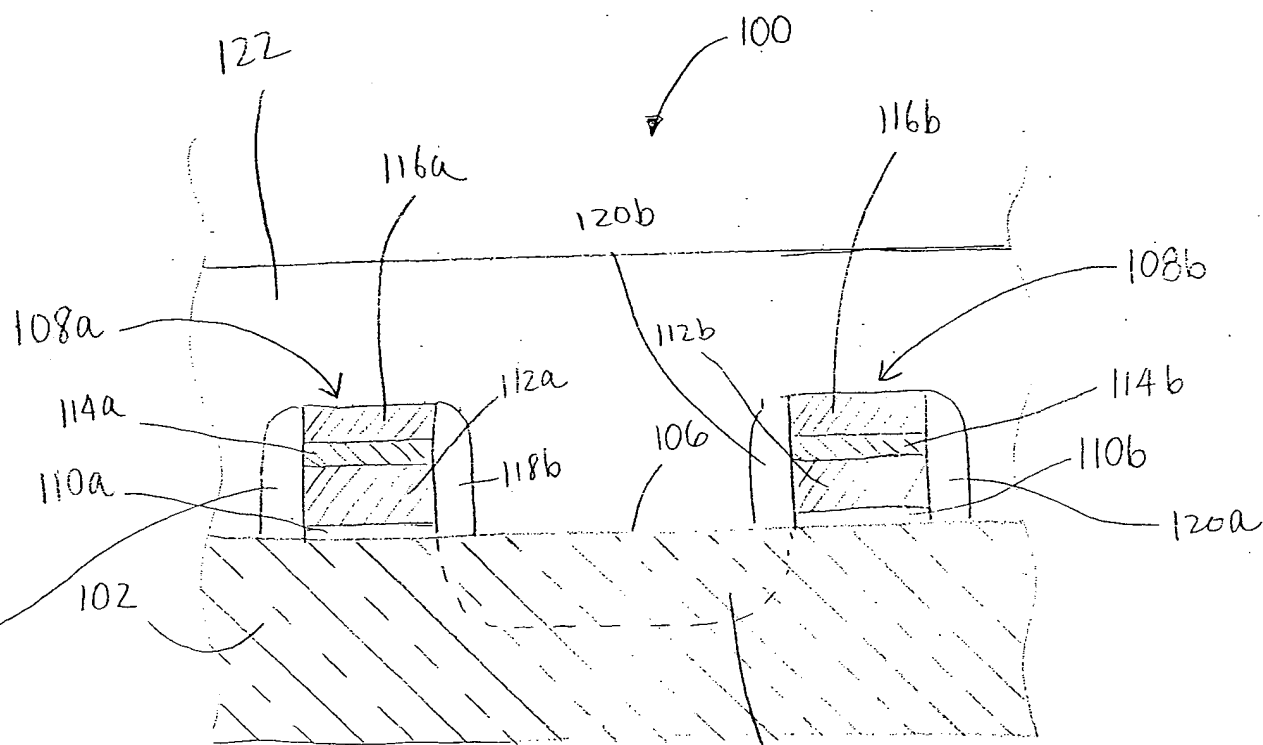

FIG 1

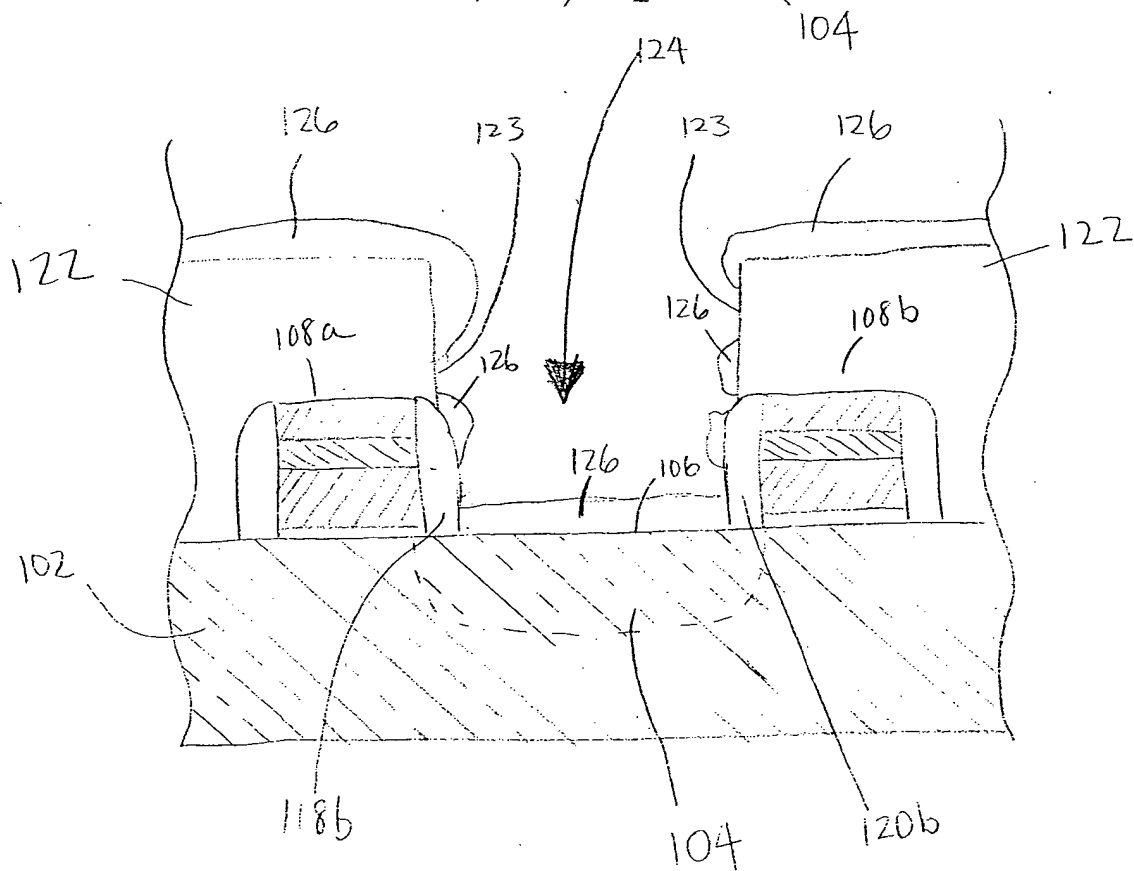

FIG. 2

FIG. 3

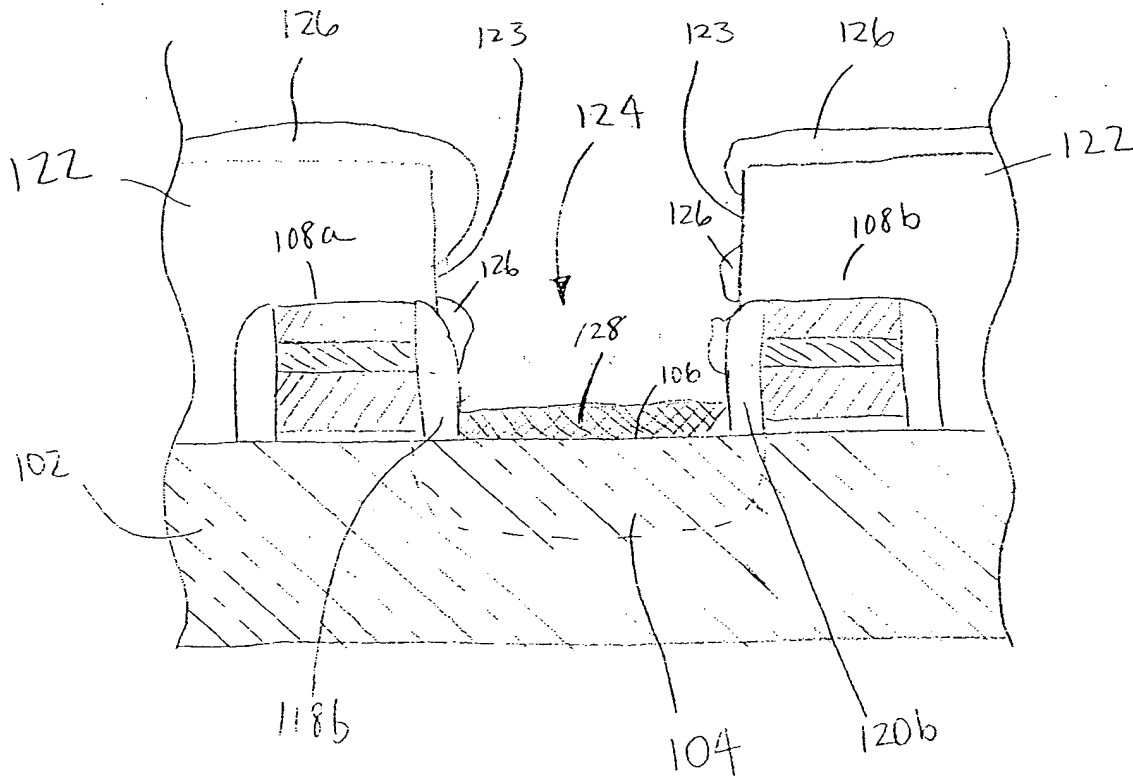

FIG. 3

A cross-sectional view of a device, likely a battery or capacitor, showing two cavities (108a and 108b) separated by a central partition (106). The cavities are filled with a material (108a and 108b) and are surrounded by a dielectric material (122). The cavities are connected to a common terminal (104) at the bottom. The device is shown in a cross-section with various layers and components labeled with reference numerals.
